EXAMINER'S COMMENTS

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/7/2007 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Withdrawn claims 1-4 and 15-17 have been cancelled.

Claim 8, lines 1-2, "claims 7, 15, 16 or 17" has been changed to --claim 7--.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Claims 7-14 are allowable for the reasons set forth on page 9 of Applicants' response dated 12/3/2007 and reproduced below:

In response, Applicants respectfully submit that although Wen-Teng discloses fiat or curved plates, Wen-Teng does not disclose or suggest that the electrodes are "bow-

Art Unit: 1797

shaped backwards against said sites." Wen-Teng merely states that the electrodes are curved plates without further details on their structure relative to a substrate. Thus, Applicants respectfully submit that Wen-Teng does not disclose or suggest electrodes that are bow-shaped backwards against the sites, as required by claim 7 and illustrated in Figure 7.

Furthermore, it would not have been obvious to have the electrodes "bow-shaped backwards against the sites." If the electrodes are "bow-shaped backwards against the sites," the distribution of the electric field can be concentrated in the sites, thereby improving the effectiveness of hybridization. The narrower the interval between the electrodes, the stronger the electric field. Wen-Teng contains no suggestion or disclosure of such a specific configuration of electrode or such a benefit. Therefore, for at least the above reasons, Applicants respectfully submit the combination of cited art does not disclose or suggest the invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM H. BEISNER whose telephone number is (571)272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys J. Corcoran can be reached on 571-272-1214. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
